

HQ430d Benchtop Single Input, Multi-Parameter Meter - pH, Conductivity, Optical Dissolved Oxygen, ORP, and ISE

Product #: HQ430D

Multiparameter: Plug and Play any IntelliCAL Probe!

Designed for your water applications, the Hach HQ430d laboratory meter is an advanced meter that takes the guesswork out of measurements. HQd^{TM} meters connect with IntelliCALTM probes that automatically recognize the testing parameter, calibration history, and method settings to minimize errors and setup time.

Flexible benchtop meter makes your lab testing of critical water quality parameters more efficient

Single input channel for flexible measurement of pH, Conductivity, Optical Dissolved Oxygen, BOD, ORP, Ammonia, Ammonium, Fluoride, Chloride, Sodium, and temperature - any IntelliCALTM smart probe.

Intuitive user interface for simple operation and accurate results

Guided calibration and check standard routines reduce calibration errors while stabilization alerts and visual measurement lock ensure that you can trust the accuracy of the results.

Trust your measurements - IntelliCALTM smart probes store all calibrations in the probe

Calibration history allows quick and easy change out of probes without re-calibrating. The HQd^{TM} smart system records serial numbers, current calibration data, user ID, sample ID, time, and date automatically in the data log for complete GLP traceability.

Enhance productivity with an ultra-bright screen and large font size for easy to read results

Internal USB ports simplify data transfer, peripherals, and software updates and connection to PCs printer and keyboards.

Convenient kit includes everything you need to start testing

Meter kit includes 4 AA batteries, power adapter, USB cable for data transfer, quick start guide, and user manual
